

In a small office, you could do without separate machines taking up too much valuable space. So why not make room for a printer that not only scans and copies, but is also network ready – meaning more than one person can use the printer. As well as saving you space, having one machine instead of three will help you cut your running costs too.

You won't compromise on quality, either. Its printing, scanning and copying are all as good as stand-alone machines, but with the convenience of an all-in-one.

Quick, easy and flexible

Fast print speeds of up to 35 pages per minute mean you won't be hanging around waiting for your prints, plus you can save even more time by printing documents direct from a USB memory stick or lab quality photos direct from your camera.

You can use the integrated 8.2cm TFT LCD screen and photo enhance feature to edit your photos before you print them. With Brother inks and paper, your photos are designed to last for up to 100 years, with no fading due to exposure to light.

Scanning options include direct to USB (including PDF format), or straight to email, while OCR – Optical Character Recognition – allows you to edit pre-printed documents without having to re-type them.

You can copy in colour or black and white, reduce or enlarge images or cut your paper costs by condensing multi-page documents onto one sheet.

Green and clean

Low power consumption, minimal noise, non-hazardous materials and recycling friendly design meet renowned Energy Star and Blue Angel environmental standards. Brother has also been awarded 100 out of 100 by the Ethical Company Organisation for the fourth year in a row – the only printer manufacturer to achieve this.

And our commitment to the environment now includes sponsoring 4 square kilometres of Amazon rainforest in partnership with Cool Earth, which protects endangered areas to help combat global warming.

You're covered

When you buy a new piece of equipment, the last thing you expect is for it to let you down. In fact, when something does go wrong with one of our products, we're as surprised as you are, as every Brother machine has been through rigorous testing. So, in the unlikely event that you do have a problem with your machine, you'll be pleased to hear that every Brother printer comes with a full 12 month warranty plus 24 hour online support. Which means if your machine does let you down, our dedicated aftercare team won't, even after your warranty period has expired.

Colourful savings

With Brother's Innobella original ink cartridges and paper you can be sure of top quality prints time after time, with true, vivid colours from 100 years lightfastness fade-resistant inks and specially coated paper. You'll even save money too, as the design uses individual ink cartridges so you only have to replace the one that's run out.

Combined Cartridges

When one colour runs out you have to throw all the other colours away - wasting ink and money.

Brother's individual ink cartridges

Using Brother's individual ink cartridges allows you to replace just the empty cartridge - saving you ink and money plus it's environmentally friendly too.
